**Reach Compliance Letter**

**Ref: Clover brands of Toner and Inkjet Cartridges**

Dear Customer,

Clover Europe has since August 2008 pre-registered all substances used on our products that would require so according to the REACH directive. We have also been working with our toner suppliers in order to have all substances they import to Europe, to be used on all locations manufacturing to Europe sales, registered in accordance to REACH so our chain of supply cannot be disrupted in any way.

We have also updated all our "Safety Data Sheets" (SDS) according to REACH requirements so this process could be completed from the obligations required at this point in time.

We declare, supported by information from our suppliers, that all substances where CAS numbers are omitted, classified as proprietary, secret or in any other form not disclosed in section 3.2 of the above mentioned "Safety Data Sheets", are not classified as hazardous according to the criteria defined by the REACH directive.

I would also like to emphasize that there are no SVHC (Substances of very high concern) in our products accordingly to the most recent lists published (last ECHA candidate list updated in January 12<sup>th</sup>, 2017).

We will continue to monitor any developments regarding this directive in order to keep complying with it.

Yours Sincerely

José Araújo  
(Technical Manager)
