

## Register of Products containing Nano materials in Clover Remanufactured Toner Cartridges

Dear customer,

Toners used by Clover in our Laser cartridges do not contain detectable amount of any substance at nanoscale\* without being strongly adhered to the toner mixture\*\* as defined in the French enforcement Decree no. 2012-232 of 17-February, 2012.

\* “Substance at nanoscale” is defined as substance as defined in article 3 of EC regulation no. 1907/2006, intentional produced at nanometric scale, containing particles, in an unbound state or as an aggregate or as an agglomerate and where, for a minimum proportion of particles in the number size distribution, one or more external dimensions is in the size range 1nm – 100nm.

\*\* “Contained without being linked to the mixture” is defined as being intentionally introduced in the mixture from which it is likely to be extracted or released under normal or reasonable foreseeable conditions of use.

Based on this, and according to this law, our understanding is that, there is no requirement for declaring any of our products to the French authorities.

Thank you.

Yours Sincerely

José Araújo - Technical Manager
