**Reach Compliance Letter**  
**Ref: Clover brands of Toner and Inkjet Cartridges**

Dear Customer,

Clover Europe has since August 2008 pre-registered all substances used on our products that would require so according to the REACH directive. We have also been working with our toner suppliers to have all substances they import to Europe, to be used on all Clover locations manufacturing to Europe sales, registered, by them or by their nominated ORs, in accordance to REACH. By accomplishing this, having SDSs set in each local language, having no influence on chemical formulations, maintaining records on quantities introduced in EU, we, and our customers, must be considered DUs (Downstream users) and our chain of supply is fully compliant for the usage in replacement printing cartridges.

We declare, supported by information from our suppliers, and to the best of our current knowledge, that all substances where CAS numbers are omitted, classified as proprietary, secret or in any other form not disclosed in section 3.2 of the "Safety Data Sheets", are not classified as hazardous according to the criteria defined by the REACH directive.

To our best knowledge and that of our suppliers, there are no SVHC (Substances of very high concern), no Article XIV or Article XVII listed substances in our products, accordingly to the most recent lists published by ECHA.

We will continue to monitor any developments regarding this directive in order to keep complying with it.

Yours Sincerely

José Araújo  
(Technical Manager)
